## BACKGROUND

From the Year 2004 to 2016, the Department of Architecture and Planning, NED University has organized eleven seminars on urban and regional planning. The series of seminar has been able to provide a platform to architects, planners, academia, industry and researchers to share their scholarly researches on emerging issues, evolving concepts and new body of knowledge in the field of urban and regional planning. These seminars focused on broad issues of education, practice, learning from experiences; planning and managing urban change; planning in a globalizing world; interface of planning with the market economy; urbanization and secondary cities; dynamics of land in planning; housing for all; planning for people; and planning and institutional arrangements. Research scholars and experts from various countries presented their papers, which were later on published as eight separate volumes of seminar proceedings - distributed free of cost to the concerned individuals, institutions and academic links.

Since year 2017, the scope of these Seminars was upgraded to two days International Conference. Till now the department of Architecture and planning has hosted six editions of International Conferences on Urban and Regional Planning (CURP) addressing the following themes.

- 1<sup>st</sup> CURP - Urban Resilience and Adaptation
- 2<sup>nd</sup> CURP - Cities Beyond City
- 3<sup>rd</sup> CURP - Innovation in Planning and Practice
- 4<sup>th</sup> CURP - Retaining City Histories – An Approach to Integrated Planning
- 5<sup>th</sup> CURP- Perspectives on Pandemic – Impact on Urban Pedagogies, Research and Practice
- 6<sup>th</sup> CURP- Cities and the Poor

A substantial number of international and national experts deliberated at length on key matters related to above stated themes. Few selected papers from the Conferences were published in the Department's peer reviewed biannual publication the; **'Journal of Research in Architecture**

**and Planning’**. Links to the journal can be found on the department’s webpage. <https://jrap.neduet.edu.pk/>

## CALL FOR PAPERS

The 7<sup>th</sup> International Conference on Urban and Regional Planning (CURP 2024) is scheduled to be held in Karachi, Pakistan on 8<sup>th</sup>-9<sup>th</sup> March, 2024 focusing on the theme of **Urban Ecology, Sustainable Planning and Inclusivity: Issues and Challenges**. This Call for Papers invites urban planners, architects, government officials, academics and all allied professionals to share their relevant knowledge and researches in-line with the theme for the benefit of public, professionals and students in related fields.

## CONFERENCE THEME

Cities and towns are expanding with exponential population growth for many economic, social, political and strategic reasons. Currently half of the population of planet lives in cities, which will increase to 60% or almost two third in 2030. The rapid urbanization and converting the green acres into concrete blocks are believed to bring economic growth, job opportunities and so on, likewise negatively impacting the natural environment and affecting physical and mental health too. The challenges of expanding pollution and climate change in an urban environment are also vital. Consequently, making many crucial components of a livable city ignored. The impacts of urbanisation, development and climate change on urban ecology and landscape are challenging and long term.

The domain of urban ecology broaches the equilibrium in natural and manmade intervention, it has now been considered as a multidisciplinary research field. It is primarily human – nature interface. Since, Urban Ecology has been largely overlooked in postindustrial cities, subsequently the agency of urban planners, geographers and architects in the developing countries are widely questioned. The objective of planning and design in the context of urban ecology needs deliberate effort, practice and implementation of guidelines and policies to inculcate awareness for its importance in sustainable city and communities. The integration of all the natural features, respecting presence of other species of nature in the planning process is extremely pivotal. The planning and design adjustments for larger objectives of urban ecology are also align with the UN Sustainable Development Goals (SDGs). These design parameters and measures are vital for sustainable growth of any city or region. Cities often appear acting as a container; it must have biodiversity for the physical and mental wellbeing of its stakeholders, the citizens. This refers to the scientific field of urban ecology, as a paradigm, which ultimately redefines the scope of nature in urban setting. It also possesses many challenges and opportunities. Through the lens of urban ecology, the principles of planning and design are modified and updated for the better and more livable natural and manmade built spaces. It revolves around public policy, its implementation, the energy efficient built form, social inclusivity and many other domains of planning.

How the clear understanding of urban ecology will help us to think, plan, design and deliver more livable, sustainable and comprehensive cities. What are the challenges and opportunities for urban ecology, in global south. These and more questions shall be taken up in this moot.

The theme of the conference **‘Urban Ecology, Sustainable Planning and Inclusivity: Issues and Challenges’** draws attention to deliberate on the issues of urban governance, healthy and livable cities, the usage of technology in improving the quality of urban ecology, generally across the globe, and particularly in Pakistan. Following are the sub themes for the Conference:
